

Eastern Missouri Public Safety Interoperable Communications Exercise

Interoperability Exercise

The Central States Communications Association, in coordination with the City and County of Cape Girardeau and St Francois County, State of Missouri Interoperability Center, and the Cybersecurity and Infrastructure Security Agency will be hosting an Interoperable Communications Exercise. This exercise will provide participants with the ability to work through realistic communications tasks based on Position Taskbook as well as real world experiences.

Participants should have some experience in public safety communications and/or information technology personnel. Participants with experience in both are ideal. We encourage participation from MO, AR, KY, TN and IL, but all who are affiliated with a public safety agency are welcome to attend. Attendance is FREE!

Additional information can be found on the Central States Communications Association website.

Questions can be directed to:
